Tax Account Ltd – Sofia, Bulgaria

After finishing my higher education in the University of national and world economy in Sofia, I was eager to go further and some years later, after working in a local audit company, I obtained my Certified public accountant/registered auditor diploma from the Bulgarian Institute of certified public accountants /ICPA/, followed by Certified government auditing professional diploma from the IIA. I am member of both organizations – ICPA and the IIA, thus following their ethic and independence rules and professional standards. In my current activity I concentrate my efforts in performing my engagements /as independent financial auditor or first level controller of European financed projects/ in due time with high quality and compliance with standards.

For the last 13 years I have been working together with my partner – Svetla Lambreva, also registered auditor, in Tax Account LTD, Sofia. We offer a wide range of services: auditing of financial statements, agreed upon procedures, accounting services, consultancy. Our clients vary from small artistic and service companies to large infrastructure building ones. From 2011 Tax Account LTD is member of EAI International – association of more than 100 professional advisory companies, which share mutual values, experience and knowledge to bring benefit to their clients. This membership also helped us to feel comfortable in a multinational surrounding.

I feel my profession as a field where I can interact with other professional as well as contribute with my abilities to fulfill our client's main objective. My deep understanding is that promoting further improvement of the client's effectiveness and efficiency in business, risk management and internal control practices is a key factor in its activity and working on this subject is very important.
